ABOUT THE PRODUCT

The COMFORT GAS 15000W gas heater is designed for heating large rooms. It requires connection to a gas cylinder for operation. Powered by propane-butane, it generates warm air and, due to its open combustion chamber, requires an air supply. It does not require a chimney.

The device is equipped with a steel heating element, a metal housing and overheating protection. W set includes a 1,5 m long hose and a pressure regulator.

The heater is used in construction, including on construction sites, and in agriculture, including animal husbandry.
