AVR PRO 10000VA 3% SERVO VOLTAGE STABILIZER

REGULAR RANGE

PRODUCT CODE
5AVRZP9100

EAN
5904100450565

CATEGORY
Voltage stabilizers and converters

SUBCATEGORY
Single-phase AVR PRO 3% mains voltage stabilizers

ABOUT THE PRODUCT

AVR PRO 10000VA 3% SERVO VOLTAGE STABILIZER is a mains stabilizer combining the functions of a voltage regulator and surge protection device. It automatically increases excessively low and decreases excessively high input voltage, ensuring a stable power supply for connected devices.

The device protects equipment against the effects of incorrect voltage and, when the safe value is exceeded, automatically disconnects it from the mains. It also suppresses interference introduced into the electrical installation by other devices and is compatible with power generators.

The PRO version uses a servomechanism to control the operation of the autotransformer, thereby providing high stabilization accuracy at the level of 3%. The stabilizer can be used with, among other things, computer systems, servers, routers, modems, network components, and consumer electronics and audio equipment.

The modern, compact design allows the device to be used in small and large spaces. AVR PRO 10000VA 3% is intended for indoor use.

TECHNICAL SPECIFICATIONS

Electrical specifications	**Apparent power**	10000 VA
	Input voltage range	130 - 260 V AC
	Input frequency	50 Hz / 60 Hz
	Output voltage	230 V
	Output voltage accuracy	± 3%
	Delay time	6 s
	Efficiency	98%
	Power consumption under load	32 W
	Power consumption without load	19,9 W

TECHNICAL SPECIFICATIONS - CONTINUED

Protection and operating environment	**Protection types**	Overload, undervoltage, overvoltage, overtemperature, short circuit
	Operating environment	Device intended for indoor use
Overall dimensions and weight	**Device dimensions**	352 x 260 x 172 mm
	Net weight	16,8 kg ±3%
	Individual package dimensions	400 x 375 x 305 mm
	Unit packaging weight	18,4 kg ±3%
