

# AUTOMATIC VOLTAGE REGULATOR

## AVR 1000VA 8% SLIM

The **AVR 1000VA 8% SLIM** automatic voltage regulator combines the features of 2 devices: a voltage regulator and surge protection device.

### The most important features:

- Stabilizes the voltage supplied at the stabilizer input
- Automatically reduces too high mains voltage and raises too low mains voltage to the appropriate level
- Protects connected devices against damage. If the voltage increases and exceeds a safe value, the stabilizer will automatically disconnect the device from the network, protecting it against damage
- Works with power generators
- It suppresses interference introduced into the electrical network by other devices
- It is distinguished by its modern design and compact structure. Thanks to this, it will be widely used in both small and large spaces

### What devices does AVR 1000VA 8% SLIM work with?

- Computer sets, servers, routers, modems, network components
- Electronics equipment, e.g. audio amplifiers and mixers, loudspeakers, music equipment, TV sets, stereo systems, CD-DVD players

### Main technical data:

MODEL	AVR 1000VA 8% SLIM
Power	1000VA
Voltage range	140-260VAC
Frequency	50Hz
Voltage	230V
Precision	8%
Delay time	180s/6s
Protection	High/low voltage protection, overload protection, high temperature protection, circuit protection
Dimensions/Weight	252x125x76mm/2,5kg±3%
Gross dimensions/Gross weight	310x160x123mm/2,8kg
Multipack dimensions/Multipack weight	500x325x270mm/17,4kg

**AVR 1000VA 8% SLIM:**  
**INDEKS: 5AVRZS1000**  
**EAN: 5904100451982**
