ABOUT THE PRODUCT

The IPS 2600 N 12/230V (1300W/2600VA) electronic converter is designed to power electrical devices requiring 230V AC voltage from batteries and 12V vehicle electrical systems. It is suitable for vehicles and locations where direct connection to the power grid is not possible.

The device produces a modified sine wave at the output, i.e. AC voltage with a square waveform. It can power resistive-load devices, including laptops, chargers, electronic power supplies, electric kettles, televisions, consumer electronics and audio-video equipment.

The converter is equipped with undervoltage and overload protection. W the 120% load is exceeded, the device switches off automatically..charset
