ABOUT THE PRODUCT

The electronic IPS 2600 N 24/230V (1300W/2600VA) VOLTAGE INVERTER + USB is used to power devices requiring 230V AC voltage from batteries and 24V vehicle electrical systems. It is suitable for use in vehicles and locations without direct access to the power grid.

The device generates a modified sine wave at the output, i.e. AC voltage with a rectangular waveform. It is intended to power resistive- loads, such as laptops, chargers, electronic power supplies, electric kettles, televisions, consumer electronics and audio-video equipment.

The inverter is equipped with undervoltage and overload protection. W the 120% load is exceeded, the device switches off automatically. It can operate at temperatures from -10°C to +40°C.
