BATTERY TEMPERATURE SENSOR FOR POWER SINUS

REGULAR RANGE

PRODUCT CODE
3SSTEMPSEN

EAN
5904100450077

CATEGORY
Emergency power supply

SUBCATEGORY
POWER SINUS emergency power supplies (high-power)

ABOUT THE PRODUCT

The battery temperature sensor for Power Sinus power supplies monitors the battery temperature during charging. W If necessary, it reduces the charging current or switches off the charger completely.

The device is compatible with all Power Sinus power supply models. The cable is terminated with a thermistor board, which should preferably be attached to the side of the battery using a good-quality thermally conductive adhesive. The board must not be screwed to the housing or screwed or glued to the battery cells, as this may damage the battery or the electronics in the power supply.
