ABOUT THE PRODUCT

TERMO GLASS 1600W BLACK ELECTRIC HEATER is a modern, slim heater with an elegant glass front panel. Thanks to its narrow design, it does not take up much space and can be used both in a large living room and in a small room.

The device is equipped with an X-shaped aluminium heating element, providing better heating performance than typical heaters with a finned heating element. The heater offers ECO and COMFORT modes, as well as an anti-frost function, allowing operation to be adapted to the user's needs.

The heater is operated using a touch panel with a simple interface or a remote control. The heater can be programmed using a timer, while the digital thermostat and child lock improve operating convenience. Version 1600W does not have Wi-Fi control.

The model can be wall-mounted or placed on the floor. W the set includes brackets and feet.

TECHNICAL SPECIFICATIONS

Electrical specifications	**Maximum power**	1600 W (in Eco mode: 800 W)
	Voltage and frequency	230 V, 50/60 Hz
