ABOUT THE PRODUCT

COMFORT 2000W [9 RIBS] OIL-FILLED ELECTRIC RADIATOR is an elegant radiator filled with oil heated by electric heating elements located inside the unit. Once heated, it remains warm for a long time, including after being disconnected from the mains. Thanks to its compact dimensions, it is suitable for both small and large rooms, particularly in vintage arrangements inspired by the design of the 50., 60. and 70. twentieth century.

The unit emits pleasant heat, does not dry the air and operates completely silently. It is equipped with 3--stage heating power adjustment, an electromechanical thermostat, an insulated handle and overheating protection. Swivel castors make it easy to move the radiator.

TECHNICAL SPECIFICATIONS

Electrical specifications	**Maximum power**	2000 W
	Voltage and frequency	220-240 V, 50/60 Hz
	Power adjustment	3 heating levels (switches I and II)
Operating features and construction	**Protection class**	IP24
	Radiator type	Oil-filled, 9 ribs
	Control	Electromechanical thermostat (knob for continuous adjustment)
	Protection	Overheating protection
	Additional features	Insulated handle, swivel castors for easy movement, completely silent operation
Dimensions and logistics	**Radiator dimensions**	410 x 236 x 550 mm
	Net weight	7,7 kg
