ABOUT THE PRODUCT

The COMFORT 2500W [11 FIN] oil-filled electric radiator provides pleasant warmth and remains warm for a long time after being disconnected from the mains. The oil is heated by electric heating elements located inside the device.

The device operates completely silently and does not dry out the air in the room. Thanks to its compact dimensions, it is suitable for both small and large spaces, including vintage arrangements inspired by the design of the 50., 60. and 70. twentieth century.

User comfort is ensured by 3 heating power settings, an electromechanical thermostat with a control knob for smooth adjustment, an insulated handle and castors that facilitate movement. The radiator is also equipped with overheating protection.

TECHNICAL SPECIFICATIONS

Electrical specifications	**Maximum power**	2500 W
	Voltage and frequency	220-240 V, 50/60 Hz
	Power adjustment	3 heating levels (switches I and II)
Operating features and construction	**Radiator type**	Oil-filled, 11 fins
	Controls	Electromechanical thermostat (control knob for smooth adjustment)
	Protection	Overheating protection
	Additional features	Insulated handle, castors for easy movement, completely silent operation
Dimensions and logistics	**Radiator dimensions**	485 x 236 x 550 mm
	Net weight	9 kg
