## ABOUT THE PRODUCT

The energy-efficient electronic OPTI ECO 25 70/180 7 52W 60 L/MIN CIRCULATION PUMP is designed to force circulation in heating systems, including single- and two-pipe systems, underfloor heating systems, domestic central heating and domestic hot water systems, and air-conditioning systems.

The pump automatically adapts its operating characteristics to the system and the current demand. The use of an electric motor with permanent magnets reduces energy losses. The device can operate in constant-temperature systems with variable flow, systems with variable pipeline temperature, and installations with night mode and PWM signal.

The design ensures simple installation and operation through an external plug for connecting the pump. The universal design allows use in domestic installations, while the low noise level and the energy efficiency index EEI

## TECHNICAL SPECIFICATIONS

| | | |
|---|---|---|
| **Electrical Parameters and Power Supply** | **Energy class** | Class A |
| | **Power consumption (P1)** | From 5 W to 52 W |
| | **Voltage** | Compliant with the data on the device rating plate |
| **Operating features and construction** | **Maximum flow rate (capacity)** | 60 L/min |
| | **Maximum head** | 7,5 m |
| | **Maximum system pressure** | 1,0 MPa (10 bar) |
| | **Relative air humidity (RH)** | Maximum 95% |
| | **IP rating** | IP44 |
| | **Application** | Forcing circulation in domestic heating systems, domestic hot water systems, underfloor heating systems, and installations with a PWM signal |
