ABOUT THE PRODUCT

COMFORT 60 PLUS TOWER FAN is a portable device designed for air circulation indoors. It is suitable for use in, among other places, living rooms, bedrooms, kitchens, offices, restaurants, shops, warehouses and workshops.

The fan offers three airflow speed levels and three operating modes: NORMAL, NATURAL and SLEEP. The oscillating head provides oscillation within the range of 70°. The device is operated using the touch control panel or remote control. The timer enables an operating time of between 0,5 and 7,5 hours to be set, after which the device switches off automatically.

The compact design, stable base and convenient handle facilitate use and transport of the device. The fan has a modern design and black colour. Self-assembly required. Intended exclusively for private use and must not be used commercially. Disconnect the device from the power supply before cleaning; protect it from moisture and hot surfaces and keep it out of the reach of children.

TECHNICAL SPECIFICATIONS

Electrical specifications	**Power**	60 W
	Supply voltage	220-240 V / 50 Hz
