ABOUT THE PRODUCT

The COMFORT 2,5kW electric heater is a functional and practical device designed for long-term use. The heat-resistant housing made of powder-coated steel sheet is resistant to mechanical damage, while the stainless steel used in the heating element ensures structural durability.

The device does not consume oxygen, does not require fuel supplies and is designed for continuous operation. It is suitable for heating small and medium-sized rooms, such as detached houses, workshops, warehouses, greenhouses, catering, retail and service premises, and office spaces.

The heater has two knobs: for setting the operating or heating mode and for adjusting the thermostat. The built-in thermostat measures the air temperature and controls the heating element, while the fan can operate independently. Overheating protection is provided by a self-resetting thermal switch at 68°C. W the set includes a cable with a plug.

TECHNICAL SPECIFICATIONS

Electrical specifications	**Supply voltage**	220-240 V AC
	Maximum power	2500 W
	Current consumption	8,3 - 9,6 A
	Fuse	10 A

TECHNICAL SPECIFICATIONS - CONTINUED

Operating features and construction	**Power settings**	25 W (fan-only operation) / 1200 W / 2200 W
	Controls	Two knobs (left: operating mode/heating setting, right: thermostat adjustment)
	Thermostat	Built-in (measures the air temperature and controls the heating element; the fan operates independently)
	Protection	Self-resetting thermal switch (overheating protection) at 68°C
	IP rating	IP20
	Housing material	Heat-resistant housing made of powder-coated steel sheet
	Heating element	Stainless steel
	Additional equipment	Cable with a plug included W
	Application	Heating homes, warehouses, workshops, construction sites or greenhouses, depending on the cable used
Dimensions and logistics	**Heater dimensions**	210 x 160 x 221 mm
	Net weight	1,6 kg
