ABOUT THE PRODUCT

The insect killer lamp 9103 is designed to eliminate insects, including mosquitoes and flies. Attracted by ultraviolet (UV) light, insects come into contact with a high-voltage metal grid, which electrocutes them.

The device is intended exclusively for indoor use, including in homes, offices, restaurants and hotels. To ensure effective operation, the lamp should preferably be hung near a window or in front of a door, at a height of 0,8–1,2 m and at a distance of 0,3 m from the wall.

Maintenance should be performed using a dry, clean cloth, and dead insects should be removed once a week after first disconnecting the device from the power supply.

TECHNICAL SPECIFICATIONS

Electrical specifications	**Supply voltage**	230 V / 50 Hz
	Power	3 W
	Insect-killing grid voltage	800 V

TECHNICAL SPECIFICATIONS - CONTINUED

Operating features and construction	**Operating principle**	Ultraviolet (UV) light attracts insects; a metal grid electrocutes them
	Application	For indoor use only (homes, offices, restaurants, hotels)
	Effectiveness	Mosquitoes, flies and other insects
	Recommended installation	At a height of 0,8 - 1,2 m, at a distance of 0,3 m from the wall (preferably near a window or in front of a door)
	Maintenance recommendations	Clean with a dry, clean cloth; remove dead insects once a week (always after first disconnecting the device from the power supply)
Dimensions and logistics	**Dimensions**	11 x 11 x 26 cm
	Net weight	0,4 kg
