ABOUT THE PRODUCT

Summary based on the description published on the product page.

The 9637 insect killer lamp (index: 3ZZDOK9637) is used to eliminate mosquitoes, flies and other insects. It operates using ultraviolet (UV) light, which attracts insects to a metal grid under a voltage of 800 V, causing them to receive an electric shock. The device is intended exclusively for indoor use, including in bedrooms, hallways, offices, restaurants and hotels.

The lamp has a hanging design. The recommended hanging height is 0,8–1,2 m, at a distance of 0,3 m from the wall, preferably near a window or in front of a door. Power supply: 230 V / 50 Hz. Power: 3–5 W.

The device dimensions are 12 x 12 x 20 cm, and its net weight is 0,34 kg. Individual package dimensions: 13,3 x 13 x 21,2 cm; individual package weight: 0,44 kg. Clean with a dry, clean cloth, and remove dead insects from the grid once a week after disconnecting the plug from the power supply without fail.

TECHNICAL SPECIFICATIONS

Electrical specifications	Supply voltage	230 V / 50 Hz
	Power	3-5 W
	Insect-killing grid voltage	800 V
Operating features and construction	Operating principle	Ultraviolet (UV) light attracting insects; a high-voltage metal grid delivering an electric shock
	Application	For indoor use only (e.g. bedrooms, hallways, offices, restaurants, hotels)
	Effectiveness	Mosquitoes, flies and other insects
	Recommended installation	Hanging design, recommended hanging height 0,8 - 1,2 m, at a distance of 0,3 m from the wall (preferably near a window or in front of a door)
	Maintenance recommendations	Clean with a dry, clean cloth; remove dead insects from the grid once a week (always after disconnecting the plug from the power supply without fail)
