ABOUT THE PRODUCT

The domestic repeller (ultrasonic) 9001 is a device that uses electromagnetic and ultrasonic waves that affect the nervous and auditory systems of animals and insects. Pests sense the threat and move away from the repeller's operating area.

The device is intended for use against mosquitoes, flies, moths, cockroaches and rodents, including mice, rats and martens. It can be used at home and in other locations without adversely affecting people.

The built-in blue LED with a switch can serve as a small night light. For best results, continuous use of the device for 3-4 months is recommended; the first effects may be visible within the first two weeks.

W In the case of flying insects, the repeller should be placed 80-100 cm above the ground, and against rodents 20-30 cm above the ground. The device should be located away from obstacles that dampen the waves. The sound emitted to 70 kHz is audible to cats, whereas the dual-range mode 10-70 kHz is audible to people and is not recommended when people or domestic animals are present.

TECHNICAL SPECIFICATIONS

Electrical specifications	**Supply voltage**	AC 230 V / 50-60 Hz
	Power consumption	≤ 6 W

TECHNICAL SPECIFICATIONS - CONTINUED

Operating features and construction	**Operating principle**	Emission of electromagnetic and ultrasonic waves affecting the nervous and auditory systems of animals and insects
	Effectiveness	Mosquitoes, flies, moths, cockroaches, rodents (mice, rats), martens, etc.
	Electromagnetic wave frequency	0,8 Hz - 8 Hz
	Ultrasonic wave frequency	1 range: 25-70 kHz; 2 range: 10-70 kHz
	Range	150 m² (in open space)
	Operation indication	Green LED (power), yellow LED (electromagnetic waves), red LED (ultrasonic waves)
	Additional features	Built-in night light (bright blue light switched on and off by holding the middle button for 2-seconds)
	Recommended installation	20-30 cm above the ground (against rodents); 80-100 cm above the ground (against flying insects); always away from obstacles that dampen the waves
	Important notes	The sound emitted to 70 kHz is audible to cats; the dual-range mode (10-70 kHz) is highly effective but audible to people, making it unsuitable for use when people or domestic animals are present
Dimensions and logistics	**Repeller dimensions**	9 x 6 x 6 cm
	Net weight	0,083 kg
	Dimensions of the individual package	7 x 7 x 10 cm
	Weight of the individual package	0,113 kg
