ABOUT THE PRODUCT

DOBERMAN-KRET II MOLE REPELLER is a device emitting sound waves, intended to repel underground rodents and reptiles. The signal lasts 2,7 seconds, followed by a pause lasting 33,2 seconds. The cycle repeats automatically.

The device is powered by a rechargeable battery charged by a solar panel. A charged battery provides operation for the entire day.

W order to ensure effective use, installation of 2 devices every 30 metres is recommended. Installation involves connecting the connectors located in the plastic tube to the connectors on the housing, matching the connector colours, and securing the tube and housing. The plastic tube should be placed in the ground without using excessive force, leaving the base of the housing approximately 1 cm above the ground surface.

TECHNICAL SPECIFICATIONS

Electrical Parameters and Power Supply	**Power supply**	80mA Ni-MH battery (charged by a solar panel)
	Solar panel	40 x 40 mm
	Voltage and current	1,2 V / 15 mA
	Power	90 mW
Operating features and construction	**Frequency**	400 - 1000 Hz
	Sound level	75 dB
	Range (area coverage)	650 m²
Dimensions and logistics	**Dimensions**	25,7 x 7,4 cm
	Net weight	0,07 kg
	Individual package dimensions	23,5 x 8,3 x 6,5 cm
	Individual package weight	0,21 kg
