ABOUT THE PRODUCT

DOBERMAN-GARDEN GARDEN ANIMAL REPELLER is a solar-powered device designed to repel animals outdoors. It operates using ultrasound and light signals activated by an infrared sensor when motion is detected. The emitted waves are inaudible to humans.

The repeller is intended for use against, among others, martens, moles, rodents, dogs, cats and squirrels. The device can operate in all weather conditions, and the recommended installation location should be at least 25 cm above the ground, in a sunny location.

Power is supplied by a 4x 2/3 AA Ni-MH 300 mAh rechargeable battery, charged by the built-in solar panel. When switched on, a red LED illuminates and the repelling sequence begins, after which the device enters standby mode. The operating range is up to 8 m.

TECHNICAL SPECIFICATIONS

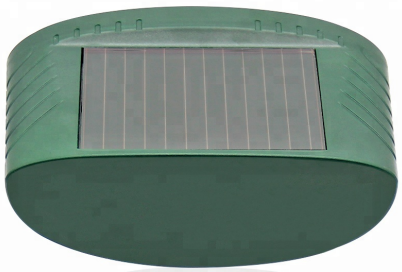

Electrical Parameters and Power Supply	**Power supply**	4x 2/3 AA Ni-MH 300 mAh rechargeable battery (included), charged by the built-in solar panel
	Energy consumption	During operation: 150 mA, standby mode: <10 µA

TECHNICAL SPECIFICATIONS - CONTINUED

Operating features and construction	**Operating principle**	The infrared sensor detects motion and activates the ultrasound generator together with light signals
	Effectiveness	Insects, moles, rodents (e.g. mice, rats), martens, dogs, cats, squirrels, etc.
	Ultrasound frequency	22-61 kHz (the technical specification text also states the range 25-61 kHz)
	Operating area	Range up to 8 m
	Installation conditions	For outdoor use in all weather conditions; recommended placement at least 25 cm above the ground in a sunny location
Dimensions and logistics	**Dimensions**	38 x 10 cm
	Net weight	0,26 kg
	Individual package dimensions	14,4 x 15,5 x 7 cm
	Individual package weight	0,33 kg
