ABOUT THE PRODUCT

The DOBERMAN MOLE I repellent generates a sound pulse at a frequency of approximately 400 Hz, which penetrates the soil. The device is intended to repel hamsters, voles, snakes, sparrows and weasels.

Power is supplied by a Ni-MH battery charged by a solar panel. When fully charged, the 900 mAh-capacity battery can provide approximately 500 hours of operation. It is recommended to install one set every 10 metres, with the best effect achieved within a radius of 5 metres.

The device can be used in hotels, villas, parks, farms and orchards. Before use, connect both parts of the device, press the button located inside, and then place it in a higher location, in firm soil, protected against flooding. W the device is used to repel underground animals, it should be placed in the soil to a depth of approximately 1/2 of its height; when repelling above-ground animals, approximately 1/3 of its height.

TECHNICAL SPECIFICATIONS

Electrical Parameters and Power Supply	**Power supply**	900mA Ni-MH battery charged by a solar panel
	Solar panel	38 x 38 mm
	Voltage and current	1,2 V / 15 mA
	Power	20 mW
Operating features and construction	**Frequency**	400 Hz, every 40 seconds
	Volume	100 dB
	Area coverage	450 m²
Dimensions and logistics	**Dimensions**	8 x 4,8 x 26,1 cm
	Net weight	0,091 kg
	Individual package dimensions	8,7 x 5,3 x 14,8 cm
	Individual package weight	0,12 kg
