AVR PRO 1000VA 3% SERVO VOLTAGE STABILIZER

REGULAR RANGE

PRODUCT CODE
5AVRZP1000

EAN
5903293765975

CATEGORY
Voltage stabilizers and converters

SUBCATEGORY
Single-phase AVR PRO 3% mains voltage stabilizers

ABOUT THE PRODUCT

AVR PRO 1000VA 3% SERVO VOLTAGE STABILIZER combines the functions of a voltage regulator and a surge protection device. It automatically reduces excessively high mains voltage and increases excessively low mains voltage, stabilizing it at the appropriate level.

The device protects connected equipment against damage. W the safe voltage value is exceeded, it automatically disconnects the device from the mains. It also suppresses interference introduced into the electrical network by other devices and is compatible with power generators.

The PRO version uses a servomechanism to control the operation of the autotransformer, providing precise voltage correction with a tolerance of 3%. The stabilizer can be used with computer sets, servers, routers, modems and network components, as well as with consumer electronics equipment, including amplifiers, audio mixers, loudspeakers, televisions, stereo systems, CD-DVD players and AV receivers.

The modern design and compact construction allow the device to be used in small and large spaces. AVR PRO 1000VA 3% SERVO VOLTAGE STABILIZER is intended for indoor use.

TECHNICAL SPECIFICATIONS

Electrical specifications	**Apparent power**	1000 VA
	Input voltage range	130 - 260 V AC
	Input frequency	50 Hz / 60 Hz
	Output voltage	230 V
	Output voltage accuracy	± 3%
	Delay time	6 s
	Efficiency	98%
	Power consumption under load	13 W
	Power consumption without load	4,1 W

TECHNICAL SPECIFICATIONS - CONTINUED

Protection and operating environment	**Protection types**	Overload, undervoltage, overvoltage, temperature, short-circuit
	Operating environment	Device intended for indoor use
Overall dimensions and weight	**Device dimensions**	147 x 228 x 130 mm
	Net weight	4,4 kg ±3%
	Unit packaging dimensions	293 x 190 x 185 mm
	Unit packaging weight	4,7 kg ±3%
