## ABOUT THE PRODUCT

Wireless floodlight LED 20W with photovoltaic panel 5W, battery 4000mAh, and PIR motion and light sensor with solar panel. Intended for indoor and outdoor lighting, including halls, car parks, facilities and sports fields.

When motion is detected at night, the sensor automatically switches on the lighting. The adjustable timer enables the lighting time after activation to be set from 10 seconds to 7 minutes. The floodlight does not require connection to the mains supply and can be installed anywhere.

The photovoltaic panel is connected to the floodlight by a cable 2,5 metre long. The maximum operating range of the motion sensor is 12 metres.
