ABOUT THE PRODUCT

The wireless floodlight LED 50W with a photovoltaic panel 10W and battery 15000mAh is designed for indoor and outdoor lighting, including halls, car parks, facilities and sports fields. It does not require connection to the mains power supply.

The floodlight is equipped with a passive infrared motion sensor (PIR) and a light sensor. When motion is detected at night, it automatically switches on the lighting, while the adjustable timer allows the lighting time to be set from 10 seconds to 7 minutes.

The device can be installed anywhere. The solar panel is connected by a cable 2,5 metre long.
