ABOUT THE PRODUCT

The JOCKER 120W solar lamp with a 12W solar panel and 12 000 mAh battery enables the selected area to be illuminated without connection to the mains. It is suitable for gardens, parks and architectural structures.

Equipped with a dusk sensor, motion sensor and wireless remote control, it automatically adjusts the lighting mode to the conditions. In W AUTO mode, after dark it illuminates at 30% power in standby mode, and upon detecting motion it increases the power to 100%. Timer settings are also available: 3h, 5h and 8h.

The lamp uses energy-efficient LED SMD5730 LEDs and a rain-resistant polycrystalline solar panel. The durable ABS housing and IP65 water resistance rating provide resistance to rain and temperature.
