ABOUT THE PRODUCT

The JOCKER 120W solar lamp with a solar panel 12W and battery 12 000 mAh enables the selected area to be illuminated without connection to the mains. It is suitable for use in gardens, parks and near small architecture structures.

The lamp uses energy-efficient LED SMD5730 LEDs and a rain-resistant polycrystalline solar panel. W During the day, the battery is charged, and after dark the lamp automatically adjusts its operating mode. The dusk sensor activates the lighting, while the motion sensor enables light control when motion is detected.

The durable ABS plastic housing is resistant to rain and temperature. Control is automatic via an external wired sensor, without a remote control. The sensor enables adjustment of SENS sensitivity, the TIME lighting duration after motion detection within the range of 5-15s, and the LUX dusk threshold.

TECHNICAL SPECIFICATIONS

Lighting and Power Parameters	**Maximum power**	120 W
	Luminous flux	930 LM
	Solar panel	12 W
	Battery	12 000 mAh
	LED LEDs	SMD5730
	Charging time	from 6 to 8 hours
	Operating time (100% power)	approx. 40 hours

TECHNICAL SPECIFICATIONS - CONTINUED

Construction and Functions	**Material**	ABS
	Water resistance class	IP65
	Control	Automatic (external wired sensor), no remote control
	Sensors	Motion and dusk sensor
	Sensor adjustment	SENS (sensitivity), TIME (illumination time after motion detection: 5-15s), LUX (dusk threshold)
	Sensor range	from 5 to 8 metres
Overall dimensions and weight	**Lamp dimensions**	62,3 x 24 x 5,5 cm
	Net weight	2,92 kg
	Individual package dimensions	36,5 x 8,5 x 63,5 cm
	Individual package weight	3,28 kg
