## ABOUT THE PRODUCT

LiFePO4 battery (lithium-iron-phosphate) COMPACT SMART 12,8V 100Ah (150A) with an integrated BMS and Bluetooth communication. It is characterised by low weight, a high number of operating cycles and very low self-discharge.

The battery is suitable for backup power systems, OFF-GRID installations and installations in vehicles such as motorhomes and food trucks. It may also be used in boat installations, exclusively with a hermetic battery enclosure.

The integrated BMS controls the charging and discharging processes and enables long-term battery storage without loss of nominal capacity. Wireless communication enables connection to the battery.
