ABOUT THE PRODUCT

MOTO AGM START/STOP AS-60 12V 60Ah L2 AUTOMOTIVE BATTERY (STARTER) from the AS series by VOLT POLSKA MOTO is a maintenance-free lead-acid battery manufactured using AGM technology (Absorbent Glass Mat). It is intended for vehicles with a 12 V electrical system, including vehicles equipped with the Start/Stop system, mild hybrid vehicles with a AGM 12 V battery, and vehicles with a high number of electrical consumers.

The AGM design provides high starting current and resistance to frequent engine starting. The battery does not require electrolyte replenishment, and its self-discharge at 25°C is below 8% after 90 days.

The battery's nominal voltage is 12 V, nominal capacity is 60 Ah, and CCA starting current at –18°C reaches 660A EN. The reserve capacity at a load of 25 A to 10,5 V is ≥100 min. The recommended charging current is approximately 6 A, and the maximum is 18A.

The battery operates within a temperature range from –30°C to 70°C. Its dimensions are 242x175x190mm, and its net weight is 17,5 kg ±3%.
