ABOUT THE PRODUCT

The MOTO VOLT POLSKA STARTAGMSTOP / AS series battery is a maintenance-free lead-acid battery using AGM technology, designed for cars and vehicles with a 12 V electrical system. It provides high starting current and resistance to frequent engine starting.

The model is suitable for vehicles equipped with a Start/Stop system, mild hybrid cars with a AGM 12 V battery, as well as vehicles with a large number of electrical consumers and increased starting requirements. The maintenance-free design does not require electrolyte replenishment.

The battery features low self-discharge, below 8% after 90 days at a temperature of 25°C, and an operating temperature range from –30°C to 70°C.

The MOTO AGM START/STOP AS-80 model has a rated voltage of 12 V, a nominal capacity of 80 Ah, and a starting current of 800 A EN at –18°C. Its dimensions are 315x175x190mm, and its net weight is 23,1 kg ±3%.
